

SAP Finance Solution Architect

Are you ready for your next adventure and shape how finance works in a global organization going through a major SAP transformation? This job is for you who are motivated by being part of a large-scale SAP S/4HANA implementation and who thrive in a role where you proactively help the business find the right solutions together. At Blue Water Shipping, we are in the midst of a major digital transformation programme (BlueCore) and are preparing for an SAP S/4HANA and TMS implementation, where SAP will play a central role in our financial setup and enable the business to operate efficiently, meet financial requirements, and scale globally

We are looking for a SAP Finance Solution Architect with a strong functional SAP Finance background and an architectural mindset. Whether you are a seasoned architect or a senior SAP FICO Consultant ready to take the next step, what matters most to us is your ability to think holistically, take ownership, and lead solution design in close collaboration with the business. You will join a global organisation with strong Danish roots, where professionalism, long-term relationships, and a pragmatic mindset shape the way we work every day.

About the role

As SAP Finance Solution Architect, you take architectural ownership of SAP Finance within our BlueCore programme, where we are implementing SAP S/4HANA Public Cloud based on fit-to-standard and clean-core principles.

A key part of the role is working closely with the Product Owner and other stakeholders to proactively identify opportunities, challenges, and solutions—translating business needs into scalable and future-proof SAP Finance solutions. You act as the architectural lead who ensures coherence across end-to-end finance processes while balancing business value, standardisation, and long-term sustainability.

Your responsibilities include:

- Leading and owning SAP Finance solution design across end-to-end finance processes
- Proactively collaborating with the Product Owner and business to identify and shape optimal solutions
- Translating business requirements into scalable, fit-to-standard SAP solutions
- Acting as architectural authority in projects, enhancements, and major changes
- Ensuring alignment between finance process design and overall enterprise architecture
- Contributing to building strong internal SAP Finance application capability post go-live

We play as a team

You will work closely with finance stakeholders, IT colleagues, integration specialists, and external partners. Collaboration is a natural part of everyday work at Blue Water Shipping. Knowledge is shared openly, decisions are made together, and different perspectives are seen as a strength in delivering robust and sustainable solutions.

We play to win

You succeed when SAP Finance is experienced as a stable, reliable, and business-enabling platform. Your architectural decisions help ensure a successful implementation and upgrade-safe solutions that support both daily operations and long-term ambitions. By combining deep finance process knowledge with a clean-core mindset, you enable the organisation to realise the full value of SAP S/4HANA Public Cloud.

Your background

You may be a strong SAP FICO Consultant with solid solution-design experience, ready to step into an architecture role or you may already be working as a SAP Finance Architect and looking to take ownership in a major transformation programme. But most importantly you are an experienced SAP Finance professional with an architectural and holistic mindset who enjoys taking responsibility and navigating the space between business and technology. You are confident in engaging with stakeholders and motivated by shaping solutions that work not only today, but also tomorrow.

What is need to have:

- Solid experience within SAP Finance
- Strong understanding of end-to-end finance processes
- Experience with SAP S/4HANA (Public Cloud, Private Cloud, or On-Premise)
- Experience leading solution design, acting as consultant, solution lead, or architect
- The ability to translate business strategy into robust SAP solutions

What is nice to have:

- Experience with SAP S/4HANA Public Cloud or GROW with SAP
- SAP Finance / S/4HANA professional certification
- Knowledge of fit-to-standard and clean-core principles
- Familiarity with CBC, SSCUIs, and SAP Cloud ALM

- Exposure to APIs, integration patterns, or SAP BTP

Practicalities

Blue Water Shipping is headquartered in Esbjerg, Denmark, with IT hubs in Esbjerg, Aarhus, and Gdansk. The BlueCore implementation is anchored in Esbjerg, and you should expect to be present in Esbjerg for key implementation activities such as workshops, design sessions, and roll-out-related collaboration. Beyond this, we offer flexibility in your day-to-day working arrangements.

Contact

For more information you are welcome to contact Henrik Madsen, Manager Finance & HR Platforms at +45 2925 8846.

Apply as soon as possible, as we review and interview candidates on an ongoing basis.

What we do – Together we create solutions
