

Project Manager (MY)

Job Summary

Join us at Blue Water Shipping, where we lead in comprehensive logistics and project management for Floating Production Systems (FPS) projects. With a track record of over 17 successful FPS projects in the last years, we handle everything from supplier coordination to logistics expediting, documentation management, shipment handling, customs formalities, and project management. Join us in ensuring seamless delivery to project sites and be part of a strong team setting new standards in global logistics. Jumpstart your career with us today!

Your Role

- Overall responsibility for the commercial and operational management of FPSO projects
- Ensure seamless interface and execution between BWS clients for efficient project delivery
- Review and enhance existing operational processes and procedures for improved efficiency
- Lead and mentor the project team, providing guidance and support
- Bid for new tenders and RFPs issued by clients to expand business opportunities
- Monitor and manage the profit and loss (P&L) of projects
- Lead, train and mentor team members by providing guidance to enhance their skills and performance
- Handle logistics for projects and regular shipments, including coordination of road, air, sea, or other transportation methods
- Manage quoting, organizing, billing, documentation, and execution of shipments from door to door
- Analyze the schedule, quality, and performance of subcontractors and suppliers
- Assess the performance of suppliers and subcontractors to ensure high-quality services
- Adhere to ISO and OHSAS standards and guidelines provided by the company
- Maintain a strong focus on safety and promote a safe working environment for all team members
- Continuously work towards reducing the environmental impact of projects based on defined targets
- Estimate and project financial developments to ensure financial viability of projects
- Provide monthly reports to management regarding project status and financial performance
- Identify and qualify new business opportunities to support company growth
- Contribute to the development and documentation of E&P processes, including Management of Change
- Ensure sufficient and appropriate resources are available in the operational team to meet project requirements

Your Background

- Bachelor's degree in a relevant field (e.g., project management, supply chain management,) or equivalent practical experience
- Proven experience as a Project Manager in Freight Forwarding
- Strong understanding of freight forwarding in the Oil & Gas sector
- Strong knowledge of project management methodologies and best practices.
- Excellent organizational and time management skills, with the ability to prioritize and multitask effectively
- Good communication and interpersonal skills with the ability to engage and influence stakeholders at all levels
- Strong leadership qualities, with the ability to motivate and inspire team members.
- Analytical and problem-solving mindset, with the ability to make informed decisions under pressure .

Benefits

- Competitive Compensation, AWS
- Start from 20 days of Annual Leave, Work from Anywhere Option
- Medical Insurance coverage, Corporate Classpass Plan, Flexi Benefit for Health & Well-Being
- Flexi Benefit for Learning & Development
